

# Agenda

## What is a business model? (SP1)

### Topics:

- **Change**
- **Strategy vs. Tactics**
- **What is "strategic thinking"?**
- **What exactly is a "business model"?**

# Learning Objectives

1. Clear up terminology. At its core, a Business Model is describes how a firm creates and captures value.
2. Provide participants with a common language to describe the Building Blocks of a Business Model.
3. Getting to this level of detail is important, otherwise the Business Plan (Key Activities) tends to be more aspirational -- and less likely to be put into action.

# Major Depressive Disorder Loci Discovered in Large GWAS Enabled by 23andMe Participants' Data

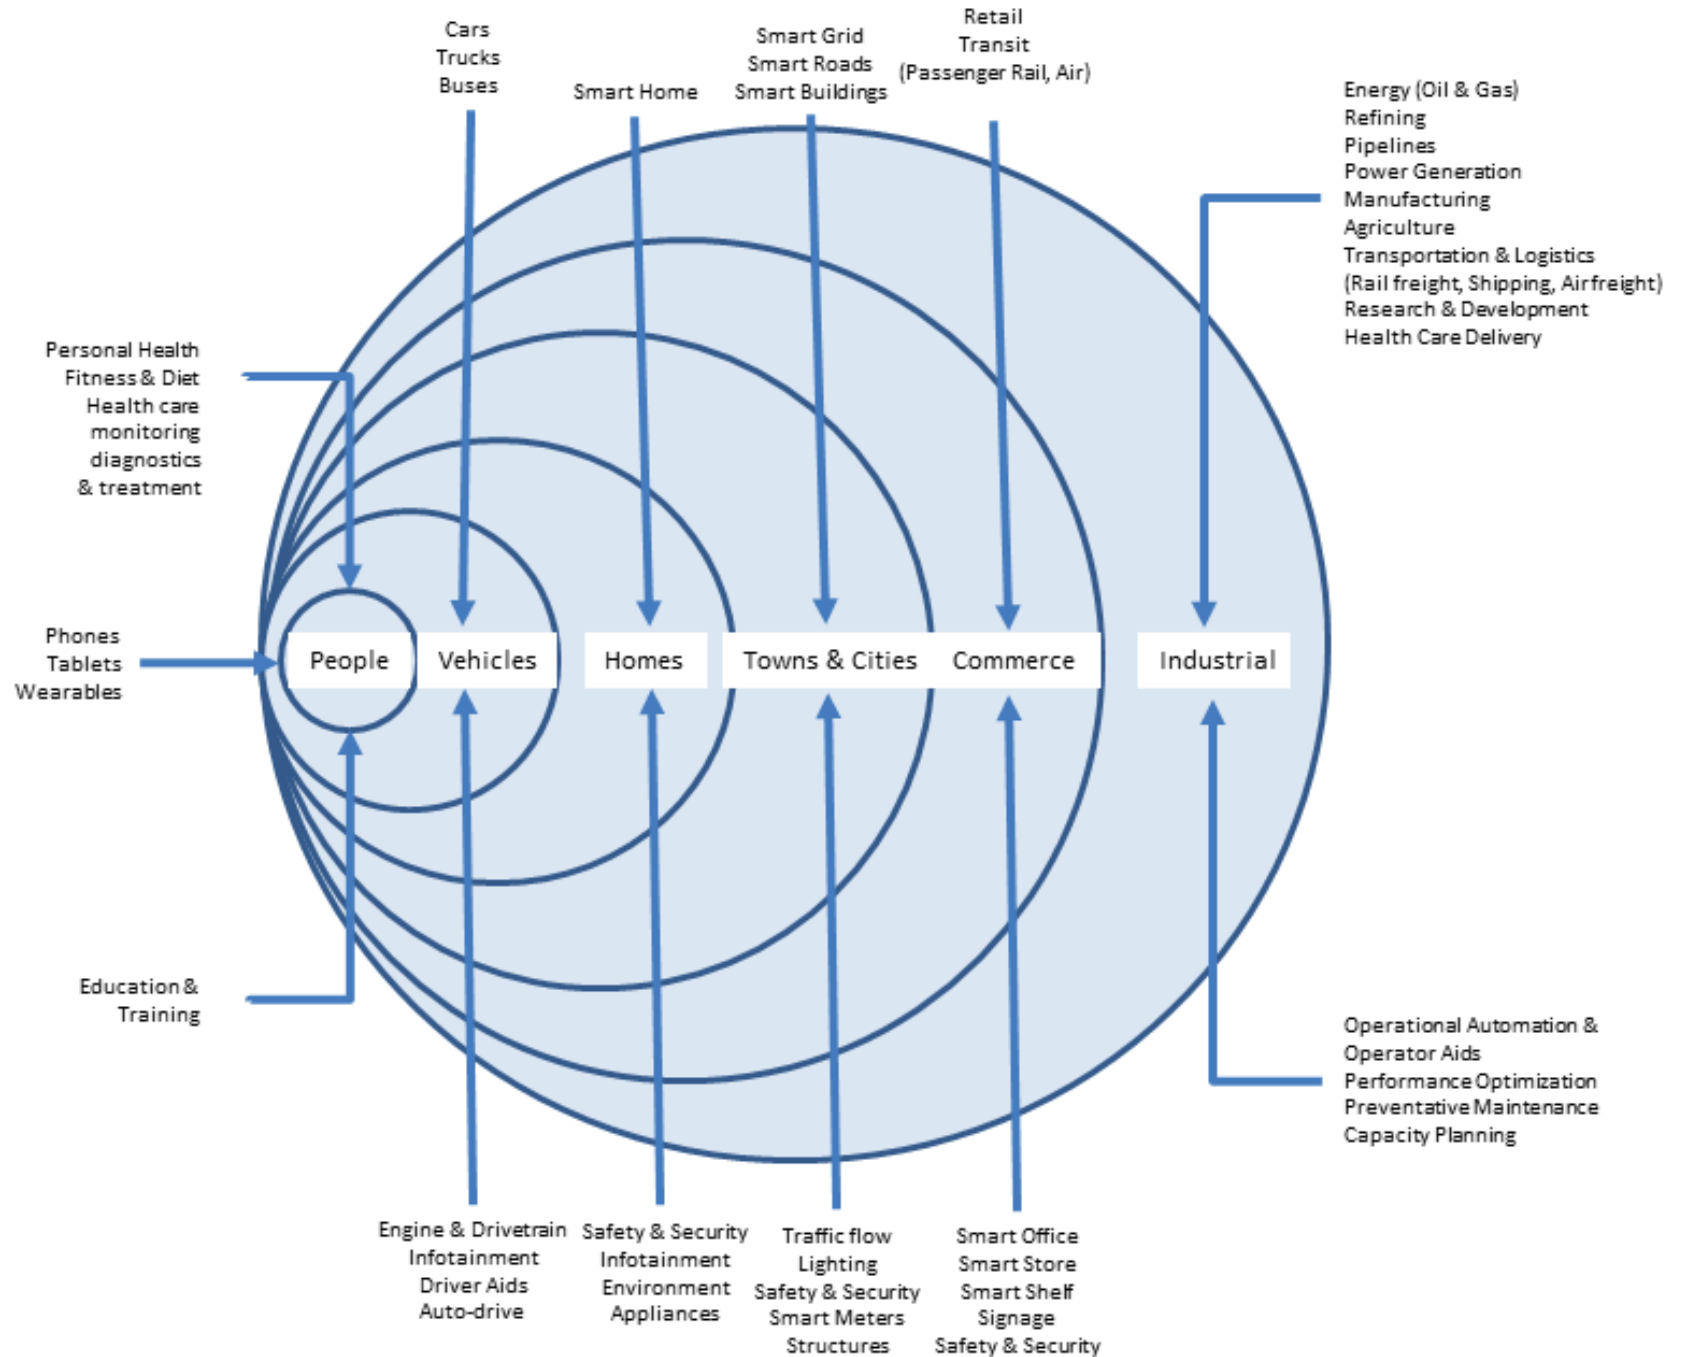

Aug 01, 2016 | a GenomeWeb staff reporter

NEW YORK (GenomeWeb) – In a study published online today in *Nature Genetics*, researchers from Pfizer Global Research and Development, 23andMe, and Massachusetts General Hospital described 15 genetic loci linked to the risk of major depressive disorder in individuals of European descent.

Using data from hundreds of thousands of 23andMe customers who agreed to participate in research, coupled with data for participants in published MDD studies, the team narrowed in on MDD-associated variants at 15 sites in the genome, including loci already implicated in other psychiatric traits.

**A CRISPR CUT:** The guide RNA (gRNA) forms a complex with Cas and directs the enzyme to cleave the target DNA to which the gRNA binds through complementary sequence. The cell tries to repair the DNA break, which often results in the insertion (as shown) or deletion of nucleotides that changes the reading frame of the gene and a creates premature stop codon.
